PROFILE

I build, I secure, and I scale. As a Full-Stack & Flutter Developer, I engineer high-performance digital products. As a Certified Ethical Hacker, Pentester, and Security Engineer, I ensure those products are bulletproof against modern cyber threats. To complete the cycle, I utilize targeted Digital Marketing strategies to bring those secure products to the right audience. A unique asset to any forward-thinking team looking for an elite technical problem-solver.

WORK EXPERIENCE

- Full Stack Web Development: Developed and maintained responsive, secure, and scalable web applications using modern front-end and back-end technologies, API integration, database management, and deployment workflows while ensuring performance optimization and maintainable architecture.
- Flutter Development: Built high-performance cross-platform mobile applications for Android and iOS using Flutter and Dart, delivering seamless user experiences through clean architecture and efficient application design.
- SOC Analysis: Monitored and analyzed security events using SIEM platforms, conducted threat detection and incident investigation, and supported security operations through proactive monitoring and incident response practices.
- Penetration Testing: Executed security assessments across web applications, networks, and systems to identify vulnerabilities, evaluate security posture, and provide actionable remediation recommendations.
- Security Engineering: Designed and implemented security controls, performed risk assessments, strengthened infrastructure security, and enhanced protection mechanisms for systems, applications, and networks.
- Certified Ethical Hacking: Applied ethical hacking methodologies to assess and validate security weaknesses, perform controlled security testing, and support organizations in improving cyber resilience.
- Bug Bounty & Vulnerability Research: Identified and responsibly disclosed security vulnerabilities across digital platforms through structured testing, detailed reporting, and collaboration with stakeholders to enhance security.
- Digital Marketing: Planned and executed digital marketing strategies including SEO, social media management, campaign optimization, analytics, and content marketing to improve online presence and business growth.
